Volianska Ielyzaveta

Frontend Developer

I am very interested in the process of creating and programming websites and web applications. I have been developing as a front-end developer for about 2 years. I have great motivation for my development in programming. To consolidate and expand my knowledge, I want to work as an intern/junior Frontend developer

Projects

I developed a number of one-page websites for presenting various topics: a business, a hobby or storing travel photos.

I developed the layout for all projects.

In one of them, in addition to the layout, I developed a gallery function using JS.

I developed all of these projects independently, no other people were involved. In some cases I used tutorials.

Tech stack: HTML, CSS, JS, github, adaptive layout tools.
